NARRATIVE

C- CCEMS responded to Creek County Jail for a female w/ altered mental status.

Hx- 56 yof has been becoming more confused, weak and has been having diarrhea for the past two weeks. UOA pt is laying supine in a bed, pt is very lethargic and breathing w/ purse lips w/ erratic respirations. Pt appears to have dry emesis on the side of her face. RN reports she does not know if the pt has vomited. RN states that she does not know the inmate, pt had been moved to the front of the jail a few days ago due to pt having constant diarrhea and they put her in a cell alone. An employee stated that the pt has been deteriorating for the past few weeks, describing pt as becoming more altered and as of today pt was unable to walk, pt was having poor food and fluid intake as well. RN reports that pt O2 saturation was low, BP was low and pt's had wheezing and rales when she listened to her lungs this morning. RN has no medical hx on the pt and does not know if the pt takes any medications on a daily basis. Staff has requested that pt go to SJMC.

A- A&Ox2, GCS 14

HENNT- no obvious trauma, normal cephalic, PERRL, no obstructions to airway or breathing, no JVD, no tracheal deviation.

Chx- no obvious trauma, lung sounds clear and equal bilaterally, equal chx rise and fall, pt denies of any chx pain at this time.

Abd- no obvious trauma, SNTTP, no distention, no guarding, no rebound tenderness. Staff reports pt has had diarrhea for the past two weeks, staff reports pt has not complained of nausea or vomiting.

Pelvis- no obvious trauma, stable, no incontinence noted.

Ext- no obvious trauma, MAEx4, PMSx4, pt denies any numbness or tingling at this time.

Skin- no obvious trauma, WPD, cap refill < 3 seconds, pt had poor skin turgor.

Rx- VS obtained, 4L, 12L unremarkable, O2 @4lpm via NC-O2 saturation improved, IV 20g L hand normal saline lock, 1000ml-600ml-NS bolus infused-WO, VS ZOLL Resuscnet -ePCR
